

Enhancements for the upcoming 2014-15 School Year include:

- **WAPs, WEPs, RIMPs, and more!** Additional forms may be authored in IEP Anywhere, giving your district the ability to centrally manage all forms related to special services.
- **Attachments.** Add attachments to ANY document authored in the program. Especially handy for uploading signed signature pages for IEPs and ETRs, or attaching progress monitoring forms.
- **Autosave.** IEP Anywhere now saves automatically while you edit.
- **In-page Print Preview.** Preview your document in-page before printing, without needing to switch to a new tab or window.
- **Recent Documents.** A “Recent” menu option allows quick look-up of documents that have recently been worked on.
- **More Banks.** Store frequently used text for ANY form text input and text box throughout the program at the district and user level.
- **Edit Bank Values In-Page.** Add and update bank values in-page while you work.
- **Create Only Forms You Need.** Rather than bundling all possible forms with each IEP and ETR, create only the forms that are necessary.
- **Advanced Document Filtering.** Filter your caseload or all documents by document status and form type.
- **Streamlined Authoring.** Forms on-screen now more closely resemble the final printed document, and text boxes automatically resize to fit user content.
- **Manage Your Own Caseload.** Previously, all documents that were not archived and on which you were a collaborator remained on your caseload until you were either removed from the document or the document was archived. IEP Anywhere now allows YOU to manage your own caseload instead by starring documents you wish to keep at the forefront of your attention.
- **Simplified Document Transfer.** Collaboration is now completed in a central location for each document. Transfer a document to a new owner and update the collaborative team all at once.
- **New Bulk Actions for Regular Users.** Transfer, complete and delete documents in bulk.
- **Undelete Documents, Users and Students.** Administrators may now restore these items.
