

Grade: Typically 10th Grade Course
Course: Geometry
Year: 2018-2019

Mission Statement

In partnership with our families and community, Lakewood City Schools will develop responsible citizens, who are critical and creative thinkers, committed to life-long learning, invested in a diverse society, and prepared for technological and global opportunities.

Thinking Skills - The student demonstrates:

1. Critical Thinking Skills include the ability to analyze, criticize, advocate ideas, reason inductively and deductively, and to reach factual and judgemental conclusions.
2. Creative Problem Solving by identifying and analyzing a problem, thinking divergently and evaluating the implementation of possible solutions.
3. Research skills by compiling, evaluating and presenting data.
4. Communication Skills

		I can write an equation for a line that is perpendicular to a given line that passes through a given point.	
	G.GPE.6: Find the point on a directed line segment between two given points that partitions the segment in a given ratio.	I can calculate the point(s) on a directed line segment whose endpoints are (x_1, y_1) and (x_2, y_2) that partitions the line segment into a given ratio, r_1 to r_2 using the formula $x = \frac{r_2x_1 + r_1x_2}{r_1 + r_2} \text{ and } y = \frac{r_2y_1 + r_1y_2}{r_1 + r_2}$	Directed Line Segment Endpoint Ratio
	G.GPE.7: Use coordinates to compute perimeters of polygons and areas of triangles and rectangles, e.g., using the distance formula.	I can use the coordinates of the vertices of a polygon graphed in the coordinate plane and use the distance formula to compute the perimeter. I can use the coordinates of the vertices of triangles and rectangles graphed in the coordinate plane to compute area.	Coordinate Plane Coordinates Distance Formula Perimeter Area Polygon Triangle Rectangle
